PROFESSIONAL SUMMARY

Results-driven Fullstack Developer with 5+ years of experience building scalable web applications, enterprise ERP systems, and AI-driven automation pipelines. Proven ability to own the full product lifecycle from architecture to deployment. Strong advocate for clean code, modern tech stacks, and building products that deliver real business impact for creators and enterprises. Fully adapted to remote work and asynchronous communication.

CORE SKILLS

- **Frontend:** React.js, Next.js, SvelteKit, TypeScript, Tailwind CSS, HTML5/CSS3, Responsive UI
- **Backend:** Node.js, Python, RESTful APIs, Microservices
- **Databases:** PostgreSQL, MariaDB/MySQL, ORM patterns
- **DevOps & Tools:** Docker, Nginx, Git, CI/CD, Linux, n8n (Workflow Automation)
- **AI Integration:** Vertex AI, Gemini API, End-to-End AI Pipelines

EXPERIENCE

Founder & Lead Fullstack Developer

EdTech Platforms (Pembelajar Belajar, AI Muta'allim, etc.) | 2021 – Present

- Architected, developed, and deployed 4 EdTech SaaS platforms serving users across multiple countries.
- Implemented robust multi-language support (i18n) for 4 languages, including SEO-optimized routing and RTL layout support.
- Built scalable backends with robust database schemas, containerized with Docker, and served via Nginx.
- Owned the end-to-end product lifecycle including payment gateway integration, user authentication, and system monitoring.

Enterprise ERP Developer (Python/PostgreSQL)

Various Enterprise Clients | 2019 – Present

- Developed custom ERP modules (Odoo/Python) for enterprise clients including Yamaha Motor Parts, Telkom Sigma, SUCOFINDO, Duniatex, and PT. Adhi Karya.
- Designed complex database schemas in PostgreSQL to handle intricate enterprise business logic and supply chain management.
- Created secure REST APIs for seamless data synchronization with external third-party systems.

AI Automation Engineer

Independent Projects | 2022 – Present

- Built end-to-end AI pipelines for automated content generation, including multi-language video, AI voice-over, and image generation.
- Developed complex n8n workflow automations integrated with SMTP, WhatsApp API, and external AI services (Vertex AI, Gemini API) to streamline business operations.

SELECTED PROJECTS

EdTech Multi-Brand SaaS System

- **Stack:** Docker, MariaDB, PHP, JavaScript, Tailwind CSS
- **Impact:** A centralized, multi-tenant learning management architecture powering 4 distinct brands from a shared core, significantly reducing maintenance overhead.

Enterprise Manufacturing Module

- **Stack:** Python, Odoo Framework, PostgreSQL, XML
- **Impact:** Custom manufacturing and supply chain workflows for Yamaha Motor Parts, optimizing inventory tracking and reducing data entry redundancy.

EDUCATION & LANGUAGES

- **Experience:** 5+ years of production-level software engineering.
- **Languages:** Indonesian (Native), English (Fluent - Written and Spoken).
